Results are based on telephone interviews conducted May 2, 2011 with a random sample of –645—adults, aged 18+, living in all 50 U.S. states and the District of Columbia.

For results based on the total sample of national adults, one can say with 95% confidence that the margin of error is ±5 percentage points.

Interviews are conducted with respondents on landline telephones and cellular phones. Each sample includes a minimum quota of 240 cell phone respondents and 360 landline respondents, with additional minimum quotas among landline respondents for gender within region. Landline numbers are chosen at random among listed telephone numbers, cell phone numbers are selected using random-digit dial methods. Landline respondents are chosen within each household on the basis of
