ISSUE REFERENDUM III AND BUDGET SEQUESTRATION

Results are based on telephone interviews with –1,028– national adults, aged 18+, conducted March 2-3, 2013. For results based on the total sample of National Adults, one can say with 95% confidence that the margin of error is ± 4 percentage points.

Interviews are conducted with respondents on landline telephones and cellular phones, with interviews conducted in Spanish for respondents who are primarily Spanish-speaking. Each sample of national adults includes a minimum quota of 50% cell phone respondents and 50% landline respondents, with additional minimum quotas by region. Landline telephone numbers are chosen at random among listed telephone numbers. Cell phones numbers are selected using random digit dial methods. Landline respondents are chosen a

1. Next, suppose that on Election Day you could vote on key issues as well as candidates. Would you vote for or against [RANDOM ORDER]?
