2016 ELECTION & CANDIDATE COMPARISONS

Results are based on telephone interviews with a random sample of -- 1,017 -- national adults, aged 18+, living in all 50 states and the District of Columbia, conducted October 27-28, 2016.

For results based on the total sample of national adults, the margin of error is ± 4 percentage points at the 95% confidence level.

For results based on the total sample of -- 945 -- registered voters, the margin of error is ± 4 percentage points at the 95% confidence level.

Interviews are conducted with respondents on landline telephones and cellular phones, with interviews conducted in Spanish for respondents who are primarily Spanish-speaking. Each sample of national adults includes a minimum quota of 60% cell phone respondents and 40% landline respondents, with additional minimum quotas by time zone within region. Landline and cell phones numbers are selected using random digit dial methods. Landline respondents are chosen at random within each household on the basis of which member has the next

7. Thinking about the media coverage of the election so far this year, do you think it has been [ROTATED:
biased in favor of Hillary Clinton, not biased in
