May 1-10, 2018

---

**Results are based on telephone interviews conducted May 1-10, 2018 with a random sample of –1,024—adults, ages 18+, living in all 50 U.S. states and the District of Columbia. For results based on this sample of national adults, the margin of sampling error is  $\pm 4$  percentage points at the 95% confidence level.**

**For results based on the sample of –542—national adults in Form A, the margin of sampling error is  $\pm 5$  percentage points.**

**For results based on the sample of –482—**

Now thinking about something else,

Q.18-19 SPLIT SAMPLED

18. *(Asked of a half sample)* When a person has a disease that cannot be cured, do you think doctors should be means if the patient and his or her family request it?

**BASED ON --542-- NATIONAL ADULTS IN FORM A**

	<u>Yes</u>	<u>No</u>	<u>No opinion</u>
