Jeff Jones, Lydia Saad
April 17-30, 2019

Results are based on telephone interviews conducted April 17-30, 2019 with a random sample of ~~–1,024~~—adults, ages 18+, living in all 50 U.S. states and the District of Columbia. ~~For results based on this sample of national adults, the margin of sampling error is ±4 percentage points at the 95% confidence level.~~

For results based on the sample of ~~–530~~—national adults in Form A and the sample of ~~– 494~~ – national adults in Form B, the margin of sampling error is ±5 percentage points.

For results based on the sample of ~~–443~~—Democrats and Democratic-leaning independents, the margin of sampling error is ±6 percentage points.

Interviews are conducted with respondents on landline telephones and cellular phones, with interviews conducted in Spanish for respondents who are primarily Spanish-speaking. Each sample of national adults includes a minimum quota of 70% cell phone respondents and 30% landline respondents, with additional minimum quotas by time zone within region. Landline and cell phone telephone numbers are selected using random digit dial methods. Gallup obtained sample for this study from Survey Sampling International. Landline respondents are chosen at random within each household on the basis of which member has the next birthday.

Samples are weighted to correct for unequal selection probability, non-response, and double coverage of landline and cell users in the two sampling frames. They are also weighted to match the national demographics of gender, age, race, Hispanic ethnicity, education, region, population density, and phone status (cell phone-only/landline only/both and cell phone mostly). Demographic weighting targets are based 0 G[-]IJ(t)853y/la pa77 TJET@0.0000

8. Next, we'd like to get your overall opinion of some people in the news. As I read each name, please say if you have a favorable or unfavorable opinion of that person --
